Installing Edge Express on Mac

- Make sure you have registered with The Edge and that you have a customer id that looks like this **paul17** and a password. If you don't know your password we can look it up for you. When registering please make sure password do not have any illegal characters in them like (*&^%)
- 2. Make sure there is no Edge Express folder in either your Downloads and Applications Folder, if there is delete them.
- 3. Go to your security and privacy settings under system preferences

4. For Operating systems other than Sierra. In the general tab select ANYWHERE under Allow Apps downloaded from section. (you may have to unlock and submit your mac password to get to this feature)

	Security & Privacy	Q Search
A login password has b Require passwo Show a messag Disable automa	een set for this user Change Password ard 5 minutes 3 after sleep or screen e when the screen is locked Set Lock Me tic login	 n saver begins essage

Allow apps downloade App Store App Store and	d from: identified developers	
Allow apps downloade App Store App Store and	d from: identified developers	
Allow apps downloade App Store App Store and	d from: identified developers	

6. Go to your firewall settings and turn it off, if it was on

7. Go to our website <u>www.theedgephoto.com.au</u> and click on the ORDER ONLINE button

8. Click on the apple support link and Download the patch from the Apple Website and Install

Java for macOS 2017-001 installs the legacy Java 6 runtime for macOS 10.13 High Sierra, macOS 10.12 Sierra, macOS 10.11 El Capitan, macOS 10.10 Yosemite, macOS 10.9 Mavericks, macOS 10.8 Mountain Lion, and macOS 10.7 Lion.

This package is exclusively intended for support of legacy software and installs the same deprecated version of Java 6 included in the 2015-001, 2014-001, and 2013-005 releases.

Quit any Java applications before installing this update.

See http://support.apple.com/kb/HT6133 for more details about this update.

See http://support.apple.com/kb/HT1222 for information about the security content of this update.

Keep your software up to date. If you need Java, download the latest version of Java for OS X directly from Oracle https://www.java.com

Post Date: Oct 26, 2017
